

http://cs.ulb.ac.be/conferences/ebiss2012/ Organized by

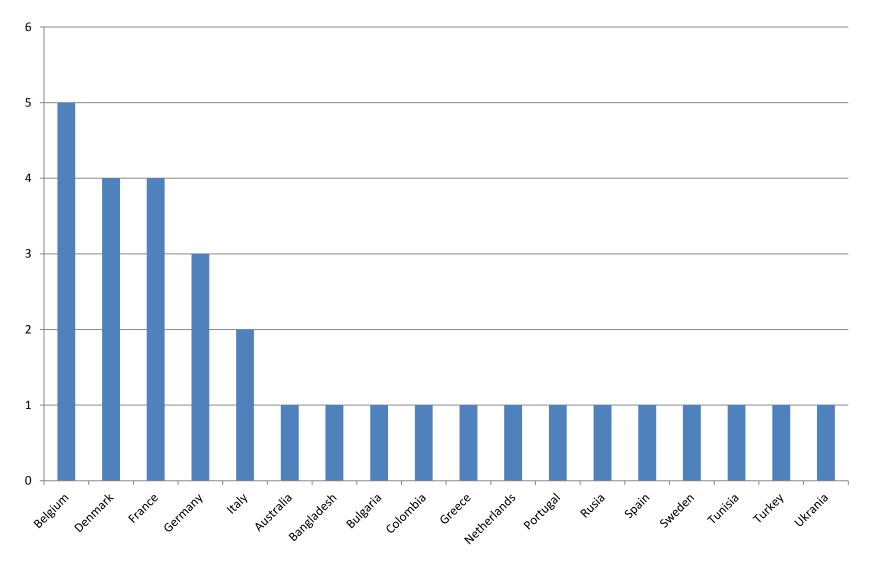

Rationale

- Presented by leading researchers in the field
- Important involvement of industry
- Goal: try to explore together how the BI domain will evolve in the forthcoming years
- A high ratio between tutors (10) and participants (35) to enable "community building" in the BI domain
- Technical and social aspects are equally important

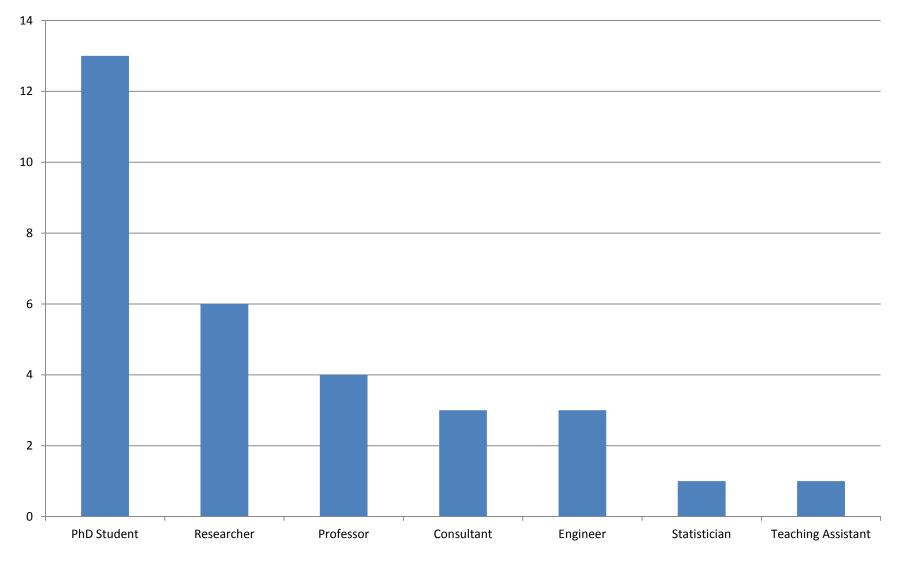

Program

	Sunday, July 15 Arrival	Monday, July 16 Foundations	Tuesday, July 17 Knowledge Discovery	Wednesday, July 18 Large Scale	Thursday, July 19 Decision Support	Friday, July 20 Industrial Presentations
08:30 - 09:00		Welcome Session Esteban Zimányi Marie-Aude Aufaure				
09:00 - 10:30		Managing Complex Multidimensional Data Torben Bach Pedersen Aalborg University	Knowledge Discovery from Constrained Relational Data Marcus Spies Ludwig-Maximilians University	Computational Intelligence Methods for Time Series Prediction Gianluca Bontempi Université Libre de Bruxelles	An Introduction to Multicriteria Decision Aid: The PROMETHEE and GAIA Methods Yves De Smet Université Libre de Bruxelles	Insights in Business Semantics Management Christophe Debruyne Pieter De Leenheer
10:30 - 11:00		Coffee break				
11:00 - 12:30		Managing Complex Multidimensional Data Torben Bach Pedersen Aalborg University	Knowledge Discovery from Constrained Relational Data Marcus Spies Ludwig-Maximilians University	Computational Intelligence Methods for Time Series Prediction Gianluca Bontempi Université Libre de Bruxelles	An Introduction to Multicriteria Decision Aid: The PROMETHEE and GAIA Methods Yves De Smet Université Libre de Bruxelles	Insights in Business Semantics Management Christophe Debruyne Pieter De Leenheer
12:30 - 14:00		Lunch				IO I
14:00 - 15:30		An Introduction of Business Process Modeling Alejandro ∨aisman Université Libre de Bruxelles	Harvesting Knowledge for Business Intelligence Nesrine Ben Mustapha Ecole Centrale de Paris	Big Data Analytics on Modern Hardware Architectures Michael Saecker Technische Universität Berlin	Visualizing and Exploring Complex Multidimensional Data Jean-Daniel Fekete INRIA	Large Graph Data Mining and Data Warehousing Sabri Skhiri Euranova
15:30 - 16:00		Coffee break				
16:00 - 17:30		A Survey of Business Process Modeling Alejandro Vaisman Université Libre de Bruxelles	Harvesting Knowledge for Business Intelligence Nesrine Ben Mustapha Ecole Centrale de Paris	Big Data Analytics on Modern Hardware Architectures Michael Saecker Technische Universität Berlin	Visualizing and Exploring Complex Multidimensional Data Jean-Daniel Fekete INRIA	Large Graph Data Mining and Data Warehousing Sabri Skhiri Euranova
17:30 - 19:00	Registration	Poster Presentation	Poster Presentation			Closing Event
19:30 - 22:30	Get Together Event				Banquet	

Participants by Country

Participants by Position

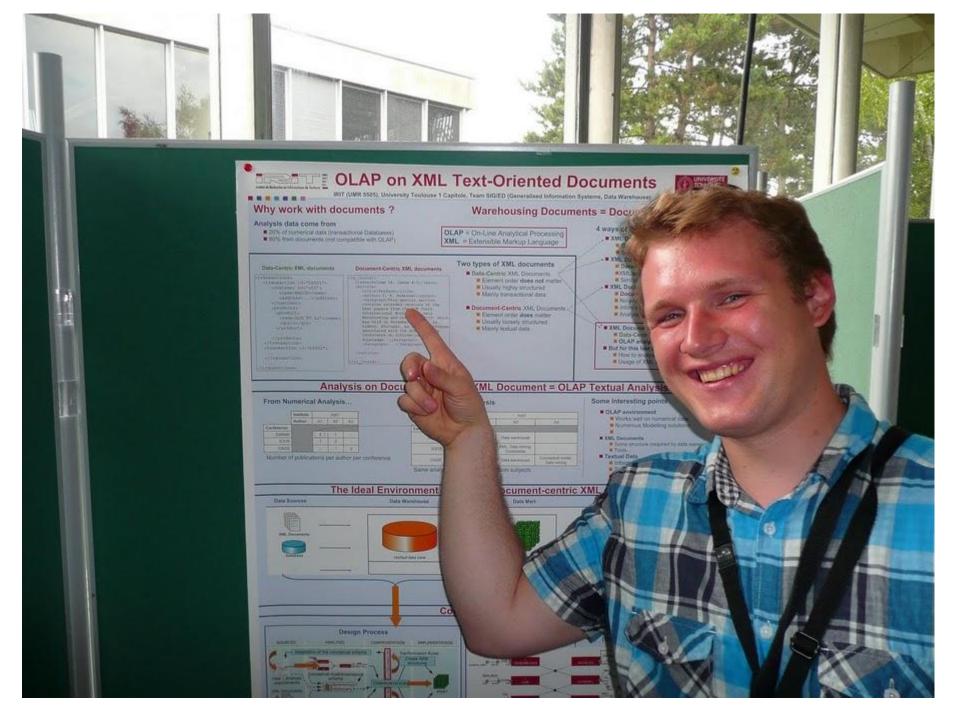

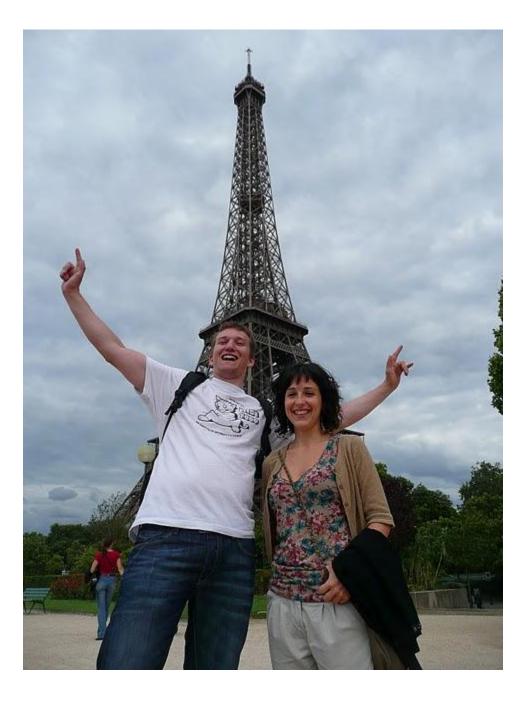

Tutors

- Academia (9): France, Germany, Denmark, Belgium
- Industry(2): Belgium, Netherlands
- We knew each other in the research domain: scientific conferences, EU projects ...
- Now reflecting on how to teach BI, how to develop BI curricula
- This summer school is one element in this reflection

Background & Objectives

Since its inception 20 years ago, Business Intelligence (BI) has become a huge industrial domain and a major economic driver, however overlooked by academics. It encompasses many scientific and technological fields including data warehouses, data mining, content analytics, business process management, visual analytics, and requires competences in information systems, web science, decision science, software engineering, and innovation and entrepreneurship. The **Erasmus Mundus** Master's Programme in **Information Technologies for Business Intelligence (IT4BI)** is designed to provide understanding, knowledge and skills in this broad scope of fields. Its main objective is to train computer scientists who understand and help develop the strategies of modern enterprise decision makers.

Presentation & Structure

The programme favours the integration of students into a network of specialists and researchers in BI. The curriculum is jointly delivered by Université Libre de Bruxelles (ULB) in Belgium, Université François Rabelais Tours (UFRT) in France, Ecole Centrale Paris (ECP) in France, Universitat Politècnica de Catalunya (UPC) in Spain, and Technische Universität Berlin (TUB) in Germany. Scholars from academic partners around the world and partners from leading industries in BI, private R&D companies, service companies, public research institutes, and public authorities will contribute to the programme by training students, providing computers, software, course material, job placement or internship perspectives, as well as financial support. This consortium will prepare the graduates not only to answer today's professional challenges by a strong connection with the needs coming from the industry, but also to pursue their studies into doctorate programs, through strong connections with the researchers' and innovators' views.

Student guide online

IT4Bi student guide is online, to download it, visit the facilities and support services page.

Applications for 2013-2015

Applications for 2012-2014 are closed after June 30th, 2012. There will be a new application session for 2013-2015, starting from September 1st, 2012.

IT4BI invites scholars

Scholars are invited to contribute to IT4BI. For more information on the application procedure please consult the scholars page.

Academic calendar for year 2012-2013

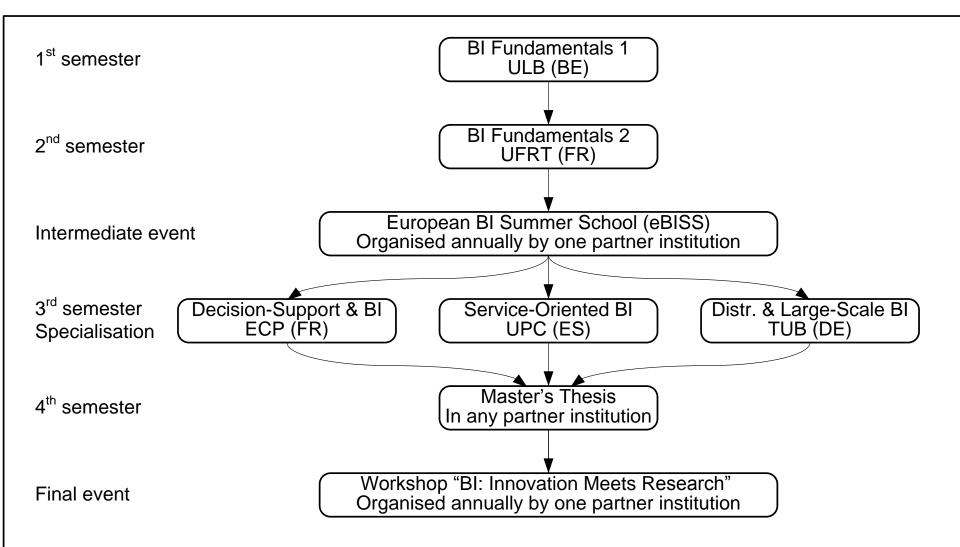

The academic calendar for year 2012-2013 is on line. Please consult the academic calendar page.

IT4BIDC is a **world-class Erasmus Mundus Joint Doctoral Programme** offered by a consortium of internationally recognised European universities:

- Université Libre de Bruxelles (ULB), coordinator
- Aalborg Universitet (AAU)
- Technische Universität Dresden (TUD)
- Universidad Politècnica de Catalunya (UPC)
- Poznań University of Technology (PUT)

IT4BI-DC offers a fully integrated three-year doctoral programme focusing on Business Intelligence with a special emphasis on applied research and joint supervision.

Joint research is realized in collaboration with leading research and industry organisations in Europe, North America, South America, Asia, Africa, and Australia.

The programme offers attractive EU Fellowships.

2nd International Workshop on Modeling and Reasoning for Business Intelligence (MORE BI). MORE BI is collocated with the 31st International Conference on Conceptual Modeling (ER 2012) Florence, Italy

Join Linked in group

Overview

MORE Business Intelligence Workshops will bring together researchers in conceptual modeling, ontology engineering, knowledge representation, and reasoning with business analysts, developers, managers, and consultants involved in the definition of requirements for, development, use, and evolution of Business Intelligence systems.

The workshop is the first of its kind to provide a forum for both research and practice in the conceptual modeling and reasoning needed for the engineering of Business Intelligence systems, and encourages interdisciplinary discussions in all aspects of this field.

Location

Florence, Italy

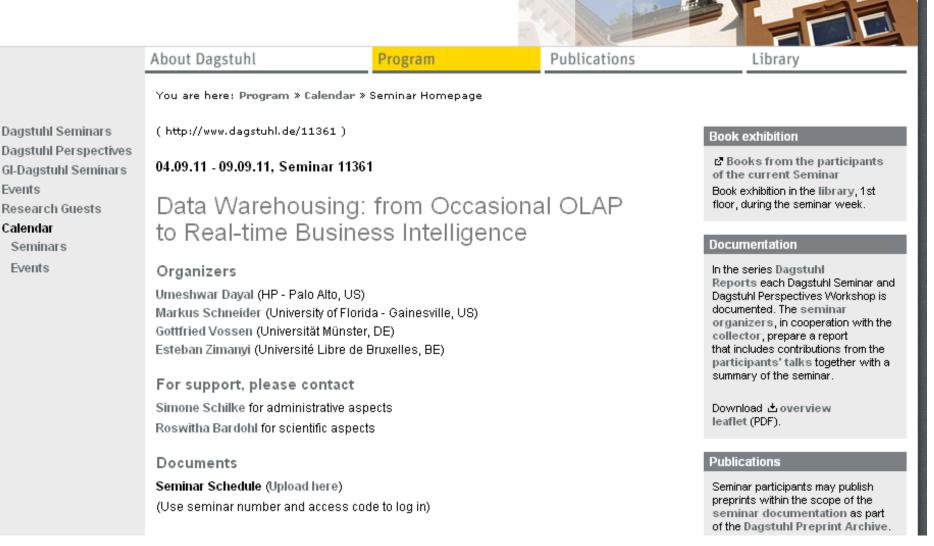

Date and time MORE-BI 2012 will be held on one full day between, and including 15th to 19th Ocbtober 2012. Date will be announced on this website.
